ARGAN OIL

The Gold of Morocco

www.aromacare.me

Argan oil is extracted from kernels of the argan tree , which is endemic to morocco , and especially common in the southwest , because the tree is found in limited area , the oil it self is quite rare and that is why is expensive . But the high concentration and small amount needed help with the cost , and with it's amazing properties for hair and skin you can dispose with many expensive hair and skin care products and stick with argan oil from hair to toe . The oil is extracted through long process includes gathering the argan nuts and drying them in the sun . The next stage involves cracking the argan nuts to obtain the kernels and then crushing to a paste . Using pressure the oil is extracted from the paste .The oil is particularly rich in vit E and some essential fatty acids (omega 3,6 &9), and has many cosmetics qualities . It serves an important composition in luxury SPA treatments worldwide .

Argan oil products restores hair shine , boosts cell regeneration , strengthens hair , gives unique softness , fights weather damages(with the capability of high resistance to ultraviolet), ads moisture to dry hair and scalp and prevents unwanted frizzy hair .

Argan oil isn't just fro women , because in addition to above great features , it is one of the most efficient products to reduce hair loss as it increase scalp blood circulation .

Argan oil also can reduce or completely eliminate by properly moisturizing the scalp.Since argan oil is full of vitamins and antioxidants, it is commonly used in hair shampoos and conditioners to repair damage caused by hair coloring and straightening treatments , hair care tools and sun damage .
